## Wednesday Challenge Form

Group Members: Christian, Edgar, Jason

**Problem Statement:** Come up with an idea for a fidget toy. It has to have the number 589 written on the toy. It also has to be creative.

**Approach:** We brainstormed through some ideas for the fidget toy. We came up with the idea of a stress ball. The stress ball would be made of water balloons, rice, and foam. Here is a picture of our planning sheet:

As you can see, there is a picture of our design and the costs of each of the materials.

**Solution:** Our group won the Wednesday challenge. The judges said that our idea and presentation was done well. We brainstormed well and came up with the good idea.

**Lessons Learned:** If I were to do this again I would have specified more on the stress ball. Maybe I would have calculated the exact quantity of rice and foam that is needed for the stress ball.
